Memo No. _____

Date / /

⑤3 Conversion of Regular Expression to Finite Automata

3 important rule

① $(a + b)$

or $A \xrightarrow{a.b} B$

② $(a.b)$

③ a^*

⑤4 Convert Regular Expression to Finite Automata Examples.

1) $b a^* b$ $L_1 = \{bb, bab, baab, \dots\}$

2) ~~$a^* b$~~ $(a + b) c$

Mo	Tu	We	Th	Fr	Sa	Su
----	----	----	----	----	----	----

Memo No. _____

Date / /

3) $a(b^+c)^+$

a
 abc
 $abc bc$
 $abc bc bc$

(54) Example

$(a|b)^+ = (abb|a^+b)^+$

$1 = +$

it's an NFA

Example

$$10 + (0 + 11)0^*1$$
